CRITERIA FOR THE SCHOLARSHIP'S CONCESSION OF THE N.G.O. "CONSTRUYENDO FUTURO" (BUILDING FUTURE)

The NGO "Building Future" (Construyendo Futuro) has education as a fundamental pillar. We think education is a way for the development of the person and one of the main sources to solve inequalities. Analysing the problems of education with people from some developing countries, we agree in the necessity of the concession of scholarships as an efficient way of cooperation with these countries (always giving the importance this topic has, although being projects that may seem cheap).

We consider that the money destined to these scholarships, comes from the effort of people who contribute. It is given from the gratitude and it is waiting for a good use of it. From the respect of the addressee, we set various criteria for the concession of these scholarships:

1-The project or addresseed association will name a coordinator of these scholarships who will be in charge of following the procedure and he/she will be the contact with the person of the NGO in charge of the scholarships.

2-The NGO promises, if possible, to keep this scholarship until the end of the requested studies (Primary, Secondary or University Education), under these conditions:

- a) Presentation of the application's fees and monthly payment receipts once every semester.
- b) School reports twice a year, the second one including the final grades.
- c) The student will get the scholarship for the next year if he/she has passed the current course.
- d) In the case of a university scholarship, it will be well appreciated if the person who receives the scholarship carries out voluntary work in any development project in a continuous and responsible way.
- e) Date when the course begins.

3-The coordinator will present a project of scholarships in which the following data will be clearly presented:

- a) Description of the concrete necessities and the reality of each student.
- b) Studies levels, population to which he/she belongs, centre where the scholarship is asked from.
- c) Scholarship type: Studies, transport, school material, dining.
- d) All these data must be presented two months before the beginning of the year.

4-The NGO will name a scholarship coordinator that will function as a connection between the project's receivers and will keep communication not only with these ones but also, in some occasions, with the ones that have the scholarship.

5-The NGO compromises to see the viability of all the solicitudes and take care of them in a short time (one month counting from the day obtained).

All these points do not try to be an impediment, on the contrary, we pretend to give scholarships the importance that we think the education deserves and of course the persons that can obtain a benefit from them.

These criteria will be yearly evaluated and the results will be communicated to the persons interested.
